

NeuroInfo[®] software

Release Notes

VERSION 2021.1.4

NEW FEATURES AND ENHANCEMENTS

- Updated image processing and image handling engines that greatly increase capabilities for image analysis and image loading and saving.
- Section registration to atlases now includes a section-spacing constraint to improve the registration of brain volumes
- Additional AI classifiers are included

ISSUES RESOLVED

- Fixes to improve stability were made throughout NeuroInfo
- Third party file-format fixes and improvements are included
