

# Instructions for applying desktop wallpaper in windows 7

After the .zip file is downloaded from the website

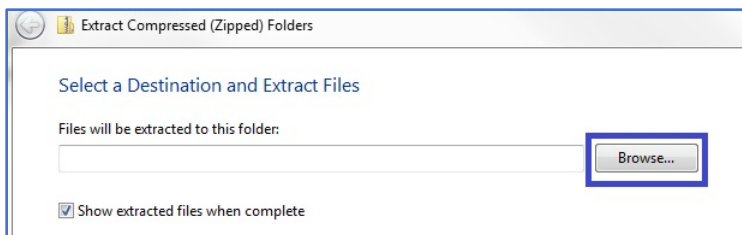

**Step 1:** Right click the downloaded folder and select “show in folder”

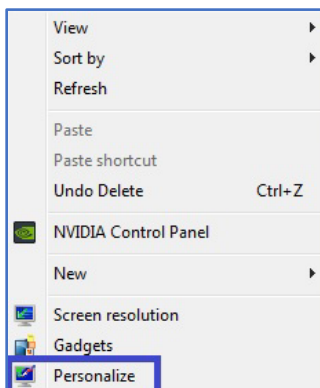

**Step 2:** Right click the folder and select “Extract All”

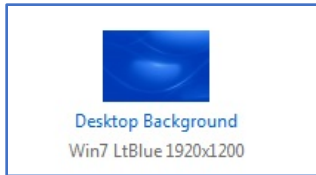

**Step 3:** Select a destination to where you want your folder to be located

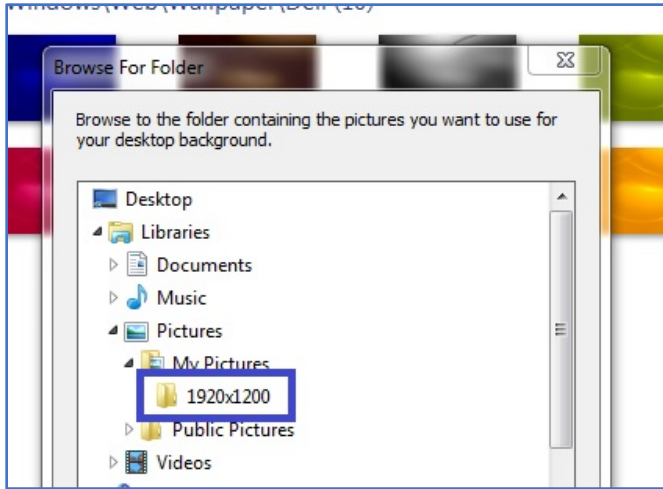

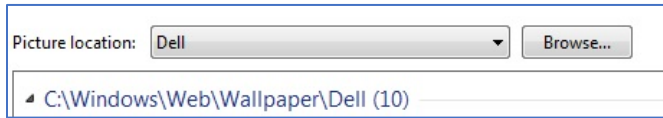

**Step 4:** Right click on your desktop and select “personalize”

**Step 5:** Select “Desktop Background”, located on the bottom of the pop-up window

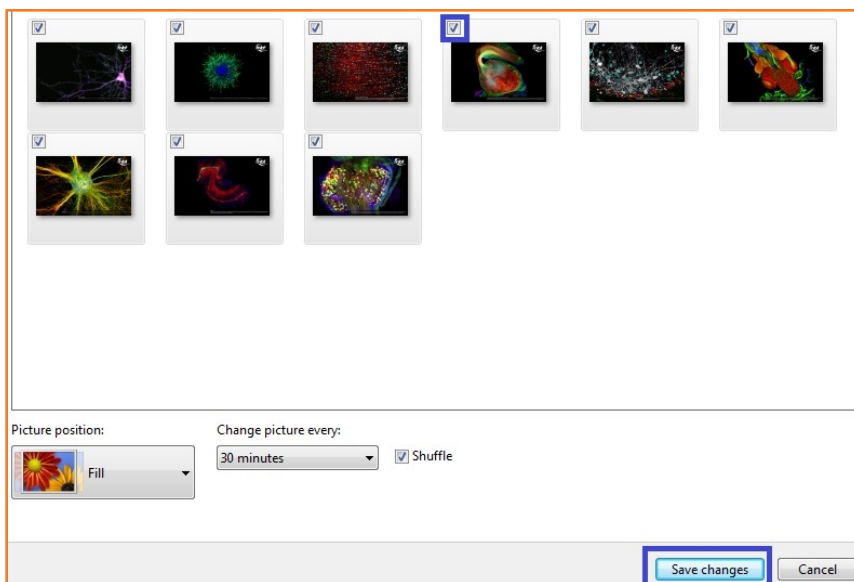

**Step 6:** Click "Browse" and locate the desktop wallpaper folder. Select the folder and press "OK"

**Step 7:** You can either choose a slideshow or single background image.

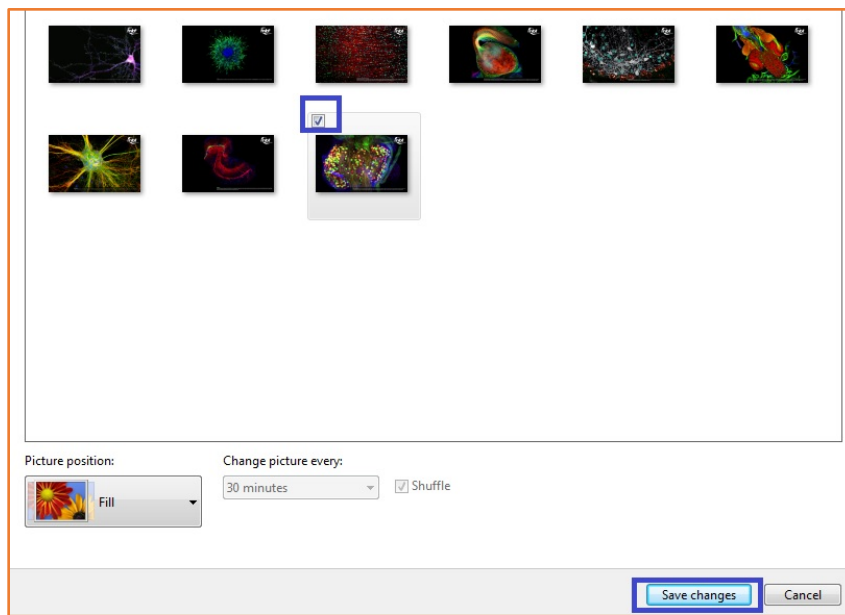

**Option 1:** If you want a slideshow:

- a. Make sure all the picture files are checked, select your desired cycle-through time and how you want the image to fit the screen. Press "Save changes" and you are set.

**Option 2:** If you want a single image:

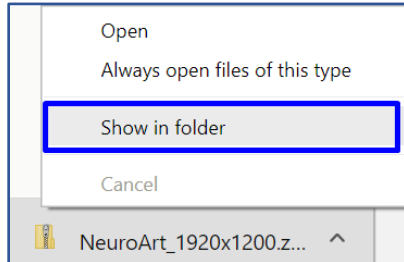

- a. Check your desired image and select how you want the image to fit the screen. Press "Save changes" and you are set.

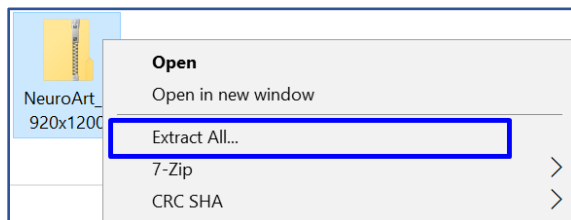

# Instructions for applying desktop wallpaper in windows 10
