

# Introducing Stereo Investigator version 2018

## Better Organization and Functionality

- Ribbon bar layout is task oriented
- Easier access to all functions
- The most common functions are very visible and can be found in multiple places
- Probes menus are easily visible and organized by type
- Recent Probes show first in ribbon
- Quick access tool bar is customizable so functions most important to the user are always visible

## Easier Usability Leads to Faster Training of New Users

### 100% Backwards Compatible with Your Existing Data

- Same data files
- Same data generated

### Ability to Edit in 3D

### 4K Monitor for High Resolution Cameras

To get version 2018 you will need an updated software and support subscription.
